SUMMARY

A focused and adaptable individual with a strong interest in software development and modern technologies. Enjoys building practical, well-structured solutions through hands-on coding and continuous learning. Curious by nature, actively explores new tools and technologies to enhance technical depth and deliver reliable, efficient outcomes.

EDUCATION

LOYOLA-ICAM COLLEGE OF ENGINEERING AND TECHNOLOGY, CHENNAI

Bachelor of Engineering in Computer Science

CGPA - 8

AMRITA VIDYALAYAM , CHENNAI

HSC - 94%

PROFESSIONAL EXPERIENCE

Generative AI Developer Intern - Prodapt Solutions Pvt Ltd

- Gained hands-on experience in Generative AI, RAG, LangChain, CrewAI, Python, and Streamlit through building and deploying AI applications.
- Developed an AI-powered Resume-to-Portfolio application using LangChain, Python, and Streamlit, enabling automated resume parsing and portfolio generation with LLMs.
- Enhanced understanding of LLM workflows, prompt design, and real-world Generative AI use cases through practical experimentation.

Freelance Full-Stack Web Developer

- Developed a full-stack resort website and booking platform using Next.js, React, TypeScript, Tailwind CSS, Node.js, PostgreSQL, and Prisma, supporting room listings, availability search, booking requests, and customer inquiry flow.
- Built an admin/reception management system with structured database models for rooms, guests, bookings, booking-room mapping, and payments, enabling staff to manage room availability, guest details, booking status, and offline reservation workflows.

PROJECTS

CALMA – Gamified Coding Platform

Designed and developed a web-based coding platform that integrates gamification to enhance programming engagement, built using React.js, Node.js, and Supabase, and featuring interactive coding challenges along with real-time progress tracking to improve user learning and retention.

Shut The Box – Web-Based Dice Game

Developed an interactive browser-based dice game using HTML, CSS, and JavaScript, implementing dice-roll simulation, tile selection logic, score calculation, game-state management, DOM manipulation, and dynamic UI updates.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript

Web Technologies: HTML, CSS, React.js, Next.js, Node.js, Streamlit

Databases & Backend: SQL, Supabase, Prisma

AI/ML Tools: LangChain, LangGraph, CrewAI, RAG

Tools: Git, GitHub, VS Code, Figma, Vercel

ADDITIONAL INFORMATION

- **Activities:** An active member of the LICET Football and Table Tennis teams, with participation in multiple inter-college tournaments.
